Ahmed Maher Alkholy

Systems & Support Specialist

Giza, Egypt | +20 155 208 4471 | am.elkholy1@gmail.com | linkedin.com/in/ahmed-alkholy

SUMMARY

Systems and support specialist with nearly 4 years of experience in business operations and in-house IT support. Designed and built two business management systems using AI-assisted development, now used by several companies. Handled the full implementation cycle: analyzing business needs, deploying systems on company networks, training users, and providing ongoing support and updates. Skilled at turning manual processes and scattered Excel files into a central, organized database, with hands-on experience in hardware support, local networks, and data and document management.

SKILLS

Systems Implementation: business needs analysis, workflow mapping, system setup and deployment, data migration from Excel, user training, post-launch support, backup and data recovery

IT Support: Windows, software and driver installation, hardware and software troubleshooting, LAN and router setup, static IP, file sharing, printers and scanners

Data & Documents: fast and accurate data entry, data verification, digital and paper archiving, reporting

AI-Assisted Development: working knowledge of React, Node.js, MySQL, REST APIs, OCR (Tesseract.js), Gemini API; ChatGPT, Claude

Tools: Microsoft Word, Excel (sorting, filtering, tables, reports), PowerPoint, Canva, Photoshop, Meta Business Suite, Amadeus (basic)

EXPERIENCE

Operations & Systems Coordinator

Nasr Al Khaleej Office for Recruiting Egyptian Manpower Abroad | Giza, Egypt | Feb 2023 – Present

- Replaced scattered Excel files and paper records with a central database system I built using AI-assisted development; it became the core system the office relies on for records, process tracking and accounts.
- Reduced file registration time from minutes to seconds using OCR data extraction and quick-entry features.
- Designed a numbering and archiving system that links every paper file to its digital record; passport losses stopped completely after implementation.
- Provide IT support for 9 office workstations: system and software installation, troubleshooting, local network setup, printers, scanners and backups.
- Track multi-stage procedures (medical checks, consular procedures, visas and travel) for thousands of client files, working with government offices and partners.
- Design company ads and social media posts, and manage company pages and paid campaigns via Meta Business Suite.

Independent AI-Assisted Business Systems Developer
Freelance | Remote | Jan 2024 – Present

- Designed and built two business management systems now used by several companies, with 20+ active users.
- **Masar Operations & Accounts System:** document and passport management, OCR data extraction, multi-stage process tracking, client and agent accounts, commissions, cash management, financial reports, and Excel/PDF export.
- **Masar HR System:** AI-based CV parsing, central candidate database, candidate-to-job matching, and management dashboards.
- Handle the full cycle: understanding client needs, designing workflows, building, testing, presenting demos to clients, and closing sales.
- Deploy systems on company computers over local networks, configure remote access (static IP, port forwarding, firewall), and manage backups.
- Train staff to use the systems and provide technical support, changes and updates after launch.

Transport Operations Coordinator (Temporary Assignment)
Hussein Hegazy Transport and Umrah Company | Makkah, Saudi Arabia | May 2025 – Aug 2025

- Coordinated transport trips for pilgrims and staff, managing schedules and timings with drivers and operations teams.
- Handled last-minute changes and urgent cases, and prepared daily operations reports.
- Worked in office and field roles on extended shifts during a high-pressure season.

EDUCATION

Bachelor of Specific Education – Educational Technology and Computer
Menoufia University | 2018 – 2022 | Grade: Good (High)

LANGUAGES

Arabic: Native | English: Good reading and writing
