# Ahmed Maher Alkholy

**Business Systems Engineer • Operations & IT Support**

Giza, Egypt am.elkholy1@gmail.com +20 155 208 4471 linkedin.com/in/ahmed-alkholy ahmedalkholy.com

## SUMMARY

Business systems engineer and freelancer since January 2014, with nearly 7 years of hands-on experience in systems, design, operations and IT support. I design and build management systems, websites and apps that work inside companies from day one: I understand the business need, build the solution, deploy it on company networks or hosting, train the team and back it with support after launch. I have delivered 17 systems and projects across systems, apps and websites, with 40+ users relying on my systems daily. I bring strong IT support and networking experience: setting up and maintaining devices, LANs and routers, static IP, firewall, printers and backups. I am also well versed in AI tools (Claude, ChatGPT, Gemini) and use them in my work. Since February 2023 I have also worked as an operations and systems coordinator at an Egyptian overseas-recruitment office.

## SKILLS

**Systems & web development:** React, TypeScript, Node.js, Express, REST APIs, Socket.IO, Tailwind CSS, MySQL, SQL Server, IndexedDB, Firebase, Android apps (Capacitor), Arabic/English (RTL) interfaces, admin panels and permission systems

**Systems implementation:** Needs analysis and workflow mapping, data migration from Excel into a central database, deployment on company networks or hosting, user training, post-launch support and updates, backup and restore

**IT support & networking:** Windows 10 / 11, software and driver installation and setup, hardware and software troubleshooting and repair, preparing and maintaining user workstations, local networks (LAN) and Wi-Fi, router and switch configuration, static IP and port forwarding, firewall and secure remote access setup, file and folder sharing over the network, printers and scanners setup and maintenance, remote access to devices, backup and data recovery, hands-on support for 9 office workstations

**Artificial intelligence:** Working knowledge of AI tools such as Claude, ChatGPT and Gemini, understanding their capabilities and limits, writing effective prompts, using them for research, writing and analysis, and connecting them to systems through APIs (Gemini, Claude) for data extraction and CV parsing

**Quality & security:** Role-based access control (RBAC), audit logging, two-factor authentication (2FA), password encryption, automated testing (Playwright), SQL Server → MySQL migration and reconciliation

**Data & office:** Excel (formulas, pivot tables), Word, PowerPoint, Google Sheets, data entry and verification, digital and paper archiving, reporting

**Design & ads:** Canva, Photoshop, Meta Business Suite, paid campaigns, 150+ designs for companies and pages

## EXPERIENCE

### Independent Business Systems & Websites Engineer

Jan 2014 – Present

Freelance | Remote

- Design and build business management systems running in several companies that 40+ users rely on daily.
- **Masar Operations & Accounts System:** passports, visas, travel and accounts (clients, agents, commissions, cash management), OCR data extraction, Excel/PDF reports, on a database of 130+ tables.
- **Masar HR System:** AI-based CV parsing, central candidate database, candidate-to-job matching and a 20-template CV builder.
- **Wesal app (Android):** an Arabic habits, tasks and worship app, personal or shared with family and friends.
- **Websites with full admin panels:** nisrelkhaleeg.com, forsango.com, rocklineg.com, eldahan.com and eldiwanjobs.com.
- Develop websites with full admin panels and an Android app, owning each project from requirements analysis to go-live.
- Design for companies and pages: 150+ ad and post designs on Canva and Photoshop, and manage pages and paid campaigns.

- Deliver data entry, Excel organisation and document conversion, plus company brochure websites and landing pages.
- Deploy systems on company networks or hosting, train teams, and provide support and updates after launch.

### Operations & Systems Coordinator

Feb 2023 – Present

Nesr El-Khaleej Overseas Recruitment Office – Giza, Egypt

- Manage IT support for 9 devices, the local network, printers, scanners and backups.
- Designed a central system for files and accounts that replaced scattered Excel sheets and paper records and became the office's core system.
- Cut the time to register a file from several minutes to seconds using OCR data extraction and fast entry.
- Created a numbering-and-archiving system linking every paper file to its electronic record, which stopped passport losses entirely.
- Track multi-stage procedures for thousands of files (medical, fingerprint, consulate, visa, travel) with government bodies and partners.
- Design the company's ads and manage its pages and paid campaigns on Meta Business Suite.

### Transport Operations Coordinator (temporary assignment)

May 2025 – Aug 2025

Hussein Hegazy Transport & Umrah Company – Makkah, Saudi Arabia

- Coordinated transport trips for pilgrims and staff and followed schedules and timings with drivers and operations teams.
- Handled sudden changes and urgent cases and prepared daily operations reports.
- Worked in the office and in the field on extended shifts during a high-pressure season.

## EDUCATION

**Bachelor of Specific Education – Educational Technology and Computer**

Menoufia University | 2018 – 2022 | Grade: Good (High)

## LANGUAGES

**Arabic:** Native | **English:** Good reading and writing

## ADDITIONAL INFORMATION

- Date of birth: 29 December 1999
- Military status: Temporarily exempted
- Driving license (car and motorcycle)
